G-Touch®

Interactive Touchscreen Range

All of our G-Touch® ranges are a simple to use plug and play touchscreens. They include everything you need to get going including, HDMI cable, USB cables, 3.5mm Jack and VGA Cable.

The G-Touch® range are also Windows, Mac compatible.

The software user interface is a critical factor when developing digital touch technology, and by continuously developing a 3-touch rule, it allows users to access any function within 3 touches; ensuring an intuitive and easy way to use our G-Touch® screens.

When you purchase a G-Touch® screen you also receive free SPARK II white boarding software every touchscreen.

G-Touch® Opal Series

The latest to the Gem Series is the G-Touch® Opal Range. Everything the Ruby and Sapphire has and more! With improved connectivity with USB Type C, additional memory, extra data storage and Bluetooth. Along with Android 11 built-in and the latest in chip set technology for fast and responsive use.

G-Touch® Ruby Series

The Ruby touchscreen has been designed with the future in mind, offering useful teaching tools that allow teachers to deliver dynamic and engaging lessons. With the addition of Android, the Ruby has pre installed applications to allow users to create and deliver presentations without the need for a PC.

Digital Signage

Digital Signage is the remote-controlled distribution and playback of digital content (TV programs, advertising, menus, and every sort of information) on networks of displays.

These displays can range from digital billboards to much smaller screens, either at a single location or across multiple sites. It's all about targeting the audience with relevant information. Digital signage enables users to display their messages more dynamically and targeted.

The Digital Signage application on android platform provides the features of updating the content from remote web browser, playback of video content, image, HTML web pages and scrolling text messages.

G-Touch[®] Tables

INSPIRE FUN LEARNING WITH SUBJECT SPECIFIC CONTENT.

The G-Touch[®] Tables are pre-loaded with a range of software that encourages numeracy, literacy, creativity, letter formation, music, art and much more. Many of these programmes are multitouch, enabling several children to use the screen at the same time. This encourages children to develop important skills such as socialising, learning to take turns, working together, sharing and communicating.

G-Touch[®] Tables can be used in a horizontal position as a table, allowing more students to interact together around the table. Alternatively, the tables can be tilted through 75° to enable students to use it more comfortably sitting down or if they are playing on their own. The Touch Tables have been designed with wheels which makes it easy to move from room to room with the addition of individual brakes adds extra security and safety for children.

With 22 educational apps pre-installed on the G-Touch[®] Table including 6 of the Yellow Door stories at no additional cost!

Genee Vision Visualisers

BRING YOUR PRESENTATIONS TO LIFE!

Have you ever wondered whether you can take your presentation to the next level? Or how you can display your demonstration, experiment or printed document on a larger scale?

With Genee Visualisers you can make a strong impact on your audience, adding visual content to enhance your presentation by showing your content – in almost microscopic detail.

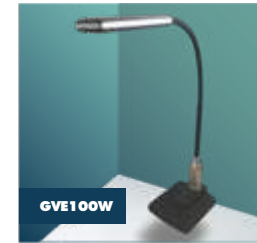

Connect your visualiser to a PC or OPS Unit and use the Free **Genee Toolbar** software to annotate, take stills, zoom and more. Utilise the Visualiser's features to compare work, analyse content and record your presentations for reviewing and much more! A key use for Visualisers is to demonstrate student work in lessons for peer led assessment, and to enable discussion through collaboration.

Available in wired or wireless versions.

Did you know Genee can help reduce your paper consumption by over 75%?

Genee Registrar

Genee Registrar is Genee's visitor management system (vms), which gives you a secure, flexible record of visitors, staff and customers' attendance on site. It produces staff and visitor badges and It takes a photo of the person each time they enter their details and even has a mobile App for identifying all people in the building in the event of an evacuation.

Visitors can sign in quickly and easily provide essential details such as their car registration and the company they are visiting from, so that you always have simple access to detailed visitor information.

Simple plug and play solution! Comes with everything you need to get going straight from the box. It can integrate with MIS systems in an education environment and can even support door entry FOBS using an RFID reader.

Q Registrar

Introducing Q Registrar, designed with efficiency and convenience in mind to revolutionise the way institutions manage queues with smooth operations.

Gone are the days of chaotic lines and frustrated visitors - this system provides real-time updates, displaying each individual's place in the queue on a clear, visible screen.

Whether it's a busy medical facility, a bustling retail store, or a crowded government office, the Q Registrar adapts seamlessly to any environment. Its customisable features allow businesses to tailor the system to their specific needs, ensuring optimal performance.

Pando Robot

Inspire curiosity in young learners with our Panda-inspired coding robot, turning coding and AI into a fun, interactive adventure. Perfectly designed to meet the growing demand for early STEAM education, making learning engaging and accessible.

Learning becomes an engaging adventure with the incorporation of graphic coding, particularly through the globally renowned software, Scratch.

Paired with the Pando hardware, designed to captivate young minds with its adorable and attractive design, graphic coding becomes not only accessible but also irresistible.

Pando serves as the ultimate tech toy, making entry-level STEAM education an exciting and enjoyable journey.
